

# OCTOMINER

**BLOCKCHAIN & MINING** *HARDWARE SPECIALISTS*

# OCTOMINER X12ULTRA™

***THE ONLY SMART GPU MINING RIG***

# ***NEXT GEN*** ***MINING RIG***

***BUILT FOR***  
***EFFICIENCY***

# ETHEREUM HASHRATE

**1600W - 683MH/S**

*\*POWER CONSUMPTION MAY VARY UP TO 5% DEPENDING ON EXACT GPUS USED AND MINER SETTINGS. 1600W POWER READING IS ACTUAL ACCURATE READING FROM THE WALL.*

AMD  
RADEON RX  
5700 SERIES

12X

***DESIGNED FOR LARGE SCALE  
BLOCKCHAIN DEPLOYMENTS***

***CLEAN AND HIGH QUALITY POWER DELIVERY***

***18AWG CABLES - 24X PCIE 6+2P CONNECTORS***

**60.96MM GPU TO GPU *SPACING***

**COMPATIBLE WITH ALL *TRIPLE SLOT WIDTH GPUS***

# ENTERPRISE GRADE POWER DELIVERY

## OCTOMINER SMART POWER SUPPLY TELEMTRY FEATURES:

- \* MONITOR PSU INPUT AND EXHAUST TEMPERATURE
- \* MONITOR AND CONTROL PSU FAN SPEED
- \* MONITOR PSU 12V OUTPUT VOLTAGE
- \* MONITOR PSU AC INPUT VOLTAGE
- \* MONITOR POWER CONSUMPTION

## SMART POWER SUPPLY TELEMTRY READOUT EXAMPLE:

AC:	Vac = 232.7V	Iac = 0.50A	Pac = 105.0W
DC:	Vdc = 12.20V	Idc = 7.4A	Pdc = 94.0W
TEMPS:	T1 = 25.9°C	T2 = 27.5°C	FAN = 1525RPM
PEAKS:	Pac = 111.0W	Idc = 9.4A	Wac = 0.003kWh

*\*ALL 3 POWER SUPPLIES HAVE THEIR INDIVIDUAL READOUT. ABOVE EXAMPLE SHOWS READOUT FOR SINGLE PSU.*

**94% EFFICIENCY ENTERPRISE GRADE  
HOT SWAP POWER SUPPLY  
(UP TO 3x 1200W, TOTAL 3600W)**

*\*OPTIONAL 277V UPGRADE POSSIBLE (3x 1400W 277V  
FOR COMBINED 4200W TOTAL)*

# ***UL & CE CERTIFIED POWER SUPPLIES***

*\*OCTOMINER X12ULTRA USES ONLY UL LISTED AND  
FULLY CE CERTIFIED POWER SUPPLIES.*

**COMPATIBLE WITH**  
**RTX 3090**

**MAXIMUM**

**330W PER GPU**

**1 YEAR**

**INTERNATIONAL  
WARRANTY**

# Panasonic

***LONG LIFE  
JAPANESE CAPACITORS***

# **HIGH PERFORMANCE & LONG LIFESPAN FANS**

- **OCTOMINER VENTUS FANS WITH HIGH STATIC PRESSURE AND CFM FOR INCREASED AIRFLOW AND OPTIMAL COOLING PERFORMANCE.**
- **HEAVY DUTY ROHS CERTIFIED PLASTIC BLADES AND HOUSING.**
- **OPTIMIZED PCB AND MOTOR DESIGN (UP TO 20% MORE EFFICIENT).**
- **IMPROVED RELIABILITY AND HEAT DISSIPATION DUE TO THICK COPPER PCB.**
- **RELIABLE JAPANESE NMB DOUBLE BALL BEARINGS FOR INCREASED LIFESPAN.**
- **HIGH PRECISION AND EFFICIENCY PWM MODULATION SPEED CONTROL.**
- **140X38MM SIZE PROVIDES HIGHER AIRFLOW AND EFFICIENCY AND ALSO LOWER NOISE.**

## **140x38MM FANS HIGH AIRFLOW & EFFICIENCY**

# ACCURATE ENVIRONMENTAL DATA

TEMPERATURE - HUMIDITY - AIR PRESSURE

TAKE FULL CONTROL OF YOUR ENVIRONMENT. PRECISE AND FAST ENVIRONMENTAL DATA HELPS KEEP YOUR HARDWARE SAFE FROM EXTREME CONDITIONS AND HELPS MAINTAIN OPTIMAL COOLING SETTINGS FOR THE CASE FANS. **SAVE ON ELECTRICITY AND KEEP YOUR HARDWARE COOL!**

ENVIRONMENTAL SENSOR TECHNICAL SPECIFICATIONS	
Operation range (full accuracy)	Pressure: 300 ... 1100 hPa Temperature: -40 ... +85 °C
<b>Humidity sensor</b>	
Response time ( $\tau_{63\%}$ )	1 s
Accuracy tolerance	$\pm 3\%$ relative humidity
Hysteresis	$\leq 2\%$ relative humidity
<b>Pressure sensor</b>	
RMS Noise	0.2 Pa (equiv. to 1.7 cm)
Sensitivity Error	$\pm 0.25\%$ (equiv. to 1 m at 400 m height change)
Temperature coefficient	$\pm 1.5$ Pa/K (equiv. to $\pm 12.6$ cm at 1 °C temperature change)
offset	

# **SMART *HARDWARE* WATCHDOG & FAN CONTROLLER**

*Full integration with any mining OS allows the smart fan controller & hardware watchdog to automatically regulate the case fan speed based on the environmental readings to keep the GPU temperatures in the optimal zone. It is possible to choose the “optimal temperature” range in the mining OS and set the minimum RPM for the case fans. Or you can choose any RPM and lock the fans into a set RPM using the manual adjustment.*

*The hardware watchdog will reboot a frozen rig automatically after the micro-controller detects that the rig has frozen and needs a reboot.*

## **SMART CONFIGURABLE LED's**

**4 Programmable LED that can help troubleshoot problematic rigs and save time during farm management.**

**RED - SYSTEM DRIVE ACTIVITY**

**GREEN - SYSTEM POWER STATUS**

**ORANGE - ERROR DEBUG**

*\*The orange LED will slow blink if the system has a larger than normal amount of bad shares and fast blink if there are any serious errors in the mining OS.*

**BLUE - HW WATCHDOG HEART BEAT**

*\*Once the system has booted up and the Hardware Watchdog & Smart Fan Controller has established a link with the mining it will have a slow “heart beat” blink to indicate successful link to the OS.*

**PURPLE - CUSTOM FEATURE**

*\*Possible to program it for any custom feature.*

**WHITE - FIND RIG**

*\*Turn the bright white LED on from your mining dashboard to help quickly find a rig in your mining farm.*

# **LET OUR SMART HARDWARE *DO THE WORK FOR YOU!***

# **FULL HARDWARE AND SOFTWARE** *INTEGRATION*

**ONE OF A KIND SOFTWARE AND HARDWARE INTEGRATION HELP BOOST PROFITS, MINIMIZE RIG DOWNTIME, SAVE ON ELECTRICITY AND IN GENERAL REDUCES THE TIME AND MANPOWER NEEDED FOR LARGE FARM MANAGEMENT.**

- \* **FULL CONTROL OVER CASE FAN SPEED**
- \* **AUTOMATIC CASE FAN RPM ADJUSTMENT BASED ON GPU CORE AND MEMORY TEMPERATURES.**
- \* **FULL POWER SUPPLY TELEMETRY READOUT AND INTEGRATION**
- \* **ACCURTE POWER CONSUMPTION AND VOLTAGE READINGS**
- \* **DEBUG LED (4 DIFFERENT COLOR LED'S ON THE FRONT OF THE RIG) TO HELP QUICKLY AND EFFICIENTLY FIND, DETECT AND TROUBLE-SHOOT PROBLEMATIC RIGS.**
- \* **FULL ENVIROMENTAL DATA READOUT PER EACH RIG. INPUT TEMPERATURE, EXHAUST, HUMIDITY AND EXHAUST TEMPERATURE.**
- \* **OCTOMINER SMART HARDWARE WATCHDOG INTEGRATION DOES AUTOMATIC REBOOTS ON FROZEN AND CRASHED RIGS.**
- \* **FRONT PANEL OLED SCREEN INTEGRATION THAT DISPLAYS ALL THE MAJOR DATA FROM THE RIG. HASHRATE, IP, MAC ADDRESS, POWER CONSUMPTION, BAD SHARES, FAN SPEED AND TEMPERATURE**

***SMART FEATURE INTEGRATION WITH ALL THE MAJOR MINING OS'S***

# *HIVE OS*

## *INTEGRATION*

### *EXAMPLE*

#### *FOR*

# *X12ULTRA*

**\* OCTOMINER AutoFan WILL REGULATE THE CASE INPUT FAN SPEED TO KEEP THE GPU CORE AND MEMORY TEMPERATURES IN THE OPTIMAL RANGE. POSSIBLE TO SENT THE MINIMUM AND MAXIMUM SPEED LIMITERS.**

**\* MONITOR THE INDIVIDUAL SPEED OF ALL 5 CASE FANS. DETECT IF ANY OF THEM HAVE FAILED OR ARE OUT OF SPEC.**

**\* MONITOR ACCURATE POWER DRAW FROM THE WALL. OCTOMINER RIGS IN HIVE OS DISPLAY THE ACTUAL POWER DRAW FROM THE WALL, NOT THE ESTIMATED POWER DRAW OF GPUS COMBINED.**

**FEATURED ON THE OFFICIAL AMD  
BLOCKCHAIN WEB**

[illegible]

# MINING RIG SPECIFICATIONS & FEATURES

THE SMARTEST AND MOST RELIABLE GPU MINING RIG ON THE MARKET. BUILT FOR EFFICIENCY AND EASE OF MANAGEMENT. FULL SOFTWARE & HARDWARE INTEGRATION WITH ANY MINING OS (DEBUG LED's, HARDWARE WATCHDOG FOR AUTO REBOOT ON FROZEN RIGS, SMART FAN SPEED CONTROLLER WHICH ADJUSTS THE CASE FAN SPEED TO KEEP GPU's AT OPTIMAL TEMPERATURES). UP TO 10% LOWER POWER CONSUMPTION COMPARED TO OTHER GPU MINING RIGS.

FEATURED ON THE OFFICIAL AMD BLOCKCHAIN WEBSITE:

<https://www.amd.com/en/technologies/blockchain>

## OCTOMINER X12ULTRA SPECS:

CPU: Intel 1151 socket (UP TO 4 CORE i7)  
CHIPSET: INTEL B250  
RAM: UP TO 32GB  
STORAGE: MAX 3X SATA + 1 X mSATA  
PSU: MAX 3X HOT SWAP SERVER PSU  
PCIe Slots: 12X, MAX 60.96MM GPU WIDTH  
RIG DIMENSIONS: 90.5x17.5x40CM

## COMMON PSU CONFIGURATIONS:

2x 1200W 94% EFF - **2400W COMBINED**  
2x 1400W 277V - **2800W COMBINED**  
3x 750W 94 EFF - **2250W COMBINED**  
3X 1200W 94% EFF - **3600W COMBINED**  
3x 1400W 277V - **4200W COMBINED**

**CUSTOMISATION POSSIBLE FOR LARGE SCALE BULK ORDERS**

# WHO WE ARE & WHAT WE DO

# OCTOMINER

Octominer specialises in designing & manufacturing high-density blockchain & compute hardware, that is equipped with the latest smart management features, offering customers multiple options for their data-centres. **Quality and cost efficiency are our key values.**

Octominer began manufacturing and selling unique riser-free GPU miners towards the end of 2017, making inroads in consumer sales and taking a large share of the retail market. With consistently positive feedback online, Octominer has built a solid reputation in the close-knit mining community and has become a **market leader in GPU mining hardware.**

With headquarters based in Shenzhen and incorporated in Hong Kong, Octominer is a worldwide company with engineering capabilities in Canada and Germany, along with a regional sales-force in the US. Since the end of 2018, we have focused on building the company brand image with enterprise customers, boasting **over 300,000 GPU's deployed using Octominer hardware** in datacentres worldwide.

Due to these strong relationships with datacentres, Octominer can offer hosting in datacentres with high security and low power costs.

**Octominer is an official AMD Blockchain partner**, working closely with the management team on opportunities and product development.
